MyGov Mobile Application (Department of Electronics & Information Technology)

Splash Screen

Side Bar Menu

MyGov Updates

Creative Corner

A flagship App of Govt. of India to crowdsource ideas and inputs for better governance from over 1.3 billion citizens. It allows direct connect between citizens and the government for better aligned policies.

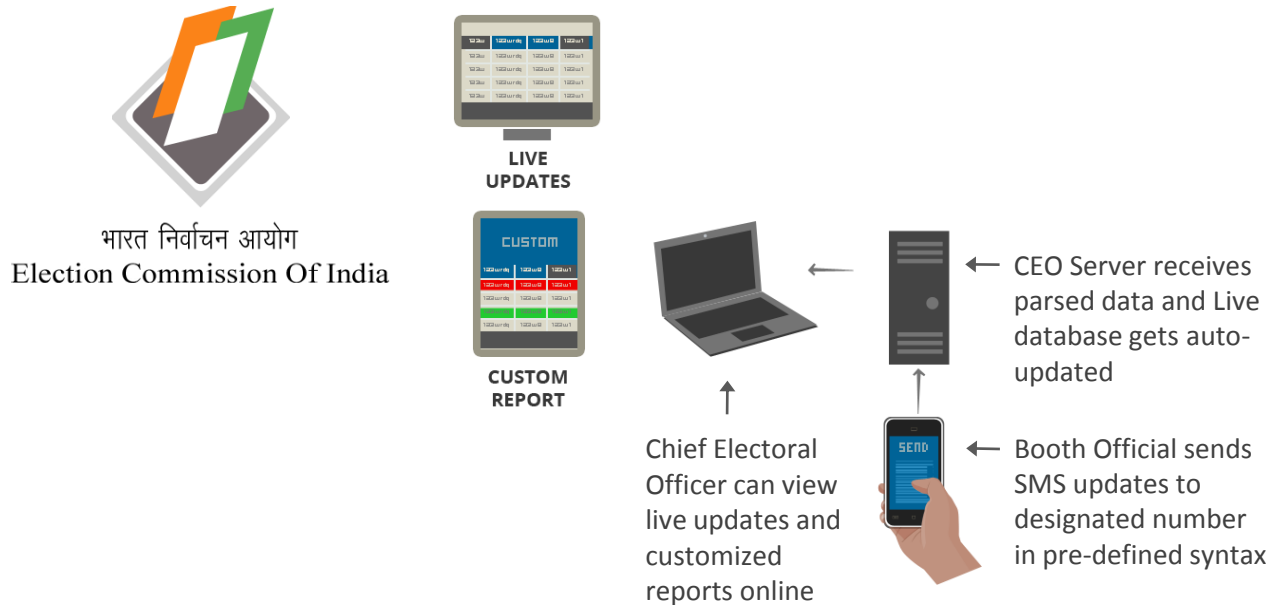

MyGov is a part of Hon'ble Prime Minister of India, Shri Narendra Modi's visionary project "Digital India", and Indus Net Technologies in association with the National Informatics Centre has developed this smart application.

Key Features

- Instant Updates on new activity
- Option to see other users' activities by tapping that user's profile
- Direct connection to "Mann Ki Baat" radio address of the Hon'ble Prime Minister where inputs will be invited from citizens
- In-app alerts and Push Notifications will inform user of post activities
- The Mobile App will allow Tasks, Discussions, Groups, Contests, Comments, etc. to be shared socially. (FB & Twitter)
- Distinct Creative Corner will display all the contests in MyGov.
- Offline mode viewing facility, like user's activity, data matrix etc.
- Shoot photos using phone camera / attach photos from gallery while commenting
- Google Mobile Analytics facility
- Users will earn credit points for their activities on MyGov.

Citizen Impact – 1.68 million registered members in MyGov platform till Nov '16

Mobile Poll Management System (Election Commission Of India)

This is a SMS based mobile app that enabled the Chief Electoral Office, West Bengal to obtain real-time updates from the polling booths in West Bengal state assembly election 2011. This 3-tiered Mobile Poll Management System facilitated smooth flow of poll related information from Polling booths to Chief Electoral Office, providing a mechanism to obtain real-time updates about the proceedings at the numerous booths and to maintain all the information in a Live system.

The mission critical application worked effectively and facilitated conduct of fair elections in the state. Constant monitoring of information from polling booths helped to reduce chances of bogus voting or booth capturing. Poll booth officials could notify CEO office instantly about non-functioning Electronic Voting Machines (EVMs) or Law and order issues, enabling them to deal with the interruptions as promptly as possible to restore peaceful voting atmosphere. Requisite decision support system was made available to the CEO office.

Key Features

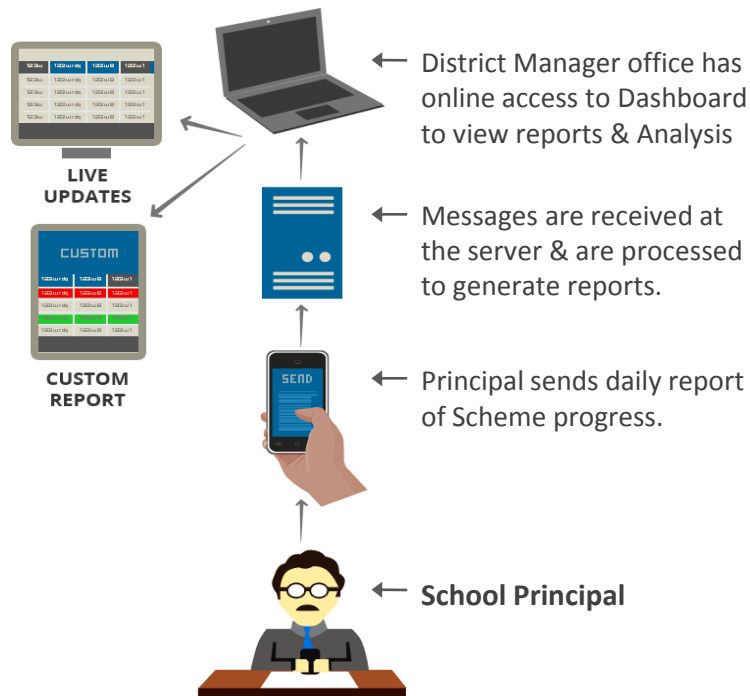

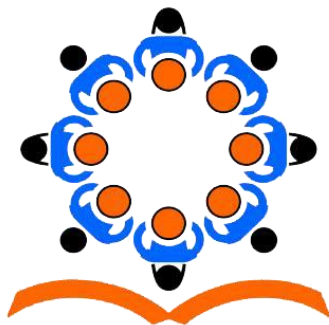

- Anytime access of live electoral information
- Customized Reports
- Automated data processing and defaulter management functionality
- Option to communicate with Chief Electoral Officer instantly
- Robust architecture for handling high load during peak time

Citizen Impact – 5,62,83,457 number of voters registered their votes in 2011 West Bengal General Election.

“I am happy to learn that ‘ICT support for electoral Management System’ for the conduct of Poll in West Bengal legislative assembly, 2011 is going to be published in ‘e-governance Services & Product’ section of coming issue (July, 2011) of e-governance’s newsletter ‘inForMaticS’.
*I would like to place on record my appreciation for the innovative ICT support and services provided by NICSI, Kolkata through empanelled vender **M/s Indus Net Technologies** especially Web reporting from Field level (SROs/ROs/DEOs) through enterprise level customized Web Portal, SMS based Poll Management, Web casting of Poll Proceedings from Polling Stations and other ICT and Web-enabled services for the smooth conduct of general election to the West Bengal legislative assembly, 2011.”*

-Sunil Kumar Gupta, IAS
CHIEF ELECTORAL OFFICER WEST BENGAL

Mobile Monitoring System (for Mid Day Meal Scheme)

This mobile based application helps government to track any corruption and manipulation related to mid-day meals served in the Government schools of India. Based on a 3-tiered system, the app lets the Government monitor the distribution of mid-day meals.

The app empowered District Magistrate office with a proper mechanism to monitor the implementation of the Mid-day-meal scheme in terms of regularity, quantity & hygiene whereby the officials could obtain instant feedback about the quality of food being served at schools. Given the sensitive nature of the scheme, fast remedial actions were required in case of discrepancies or exceptions.

Citizen Impact – Serving 1,20,000,000 children in over 1,265,000 schools and Education Guarantee Scheme centres, it is the largest such programme in the world.

Mobile Monitoring System (for Mid Day Meal Scheme)

Key Features

- Flexible web based system to trigger various alert messages
- Flexible admin interface to customize the different levels of message deliveries
- Auto Generated Exception Reports at your finger tips
- Incoming Messaging facilities with auto compilation of various messages highlighting important features
- Find grained user roles / access levels

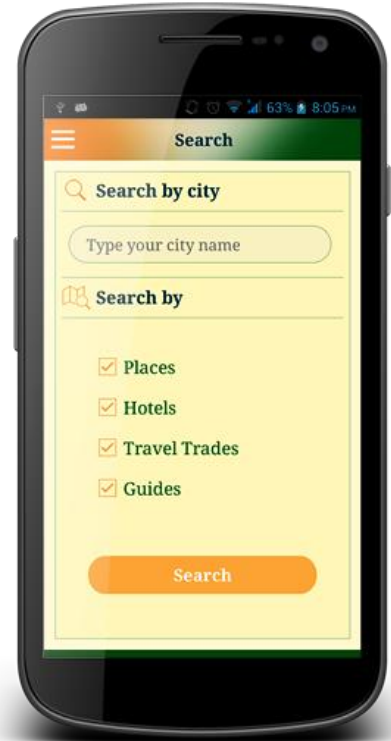

Achievement

- Our solution facilitated the inspection on exception basis so as to maintain the efficacy of the Mid-day meal scheme
- Direct and instant information mechanism from grass-root to the District level eliminated possibilities of manipulation and corruption
- Requisite Decision Support System was made available to the District level
- Improved mid-day meal programmes had a major impact on school attendance, child nutrition, and social equity

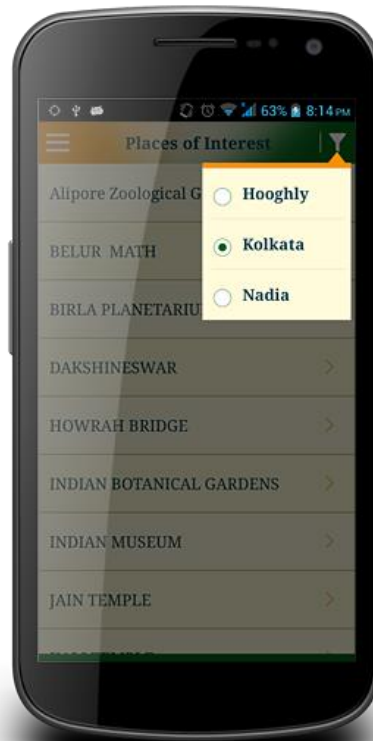

Incredible India Application (Ministry of Tourism)

Fix My Street Citizen Governance App

(UK Citizens Online Democracy)

An e-governance app that allows citizens to intuitively report and track geo-tagged infrastructure issues in their ward or council. Thus, administrative authorities can crowdsource issues and improve services.

Key Features

- Option to immediately report and track issues
- Options to quickly filter incident, photos and reports
- Immediacy and accessibility to real-time information
- Effective and direct participation in local governance
- Geo-tagging technology automatically track the location of a problem
- In-built DBMS that provides an up-to-date database to offsite workers
- Option to seamlessly integrate the uploaded information with a tool that crowd-sources information using multiple channels including SMS, e-mail and the web
- Interactive mapping allows users to zoom in and out, pan around the map & identify features in the map

Citizen Impact – 7,50,285 updates on various reports submitted by users since April 2014.

An award winning mobile application has been developed for Department of MSME and Textiles, Government of West Bengal to accomplish their initiative to provide a facility that offers a help-desk and enquiry handling system. The system is a digital gateway for micro, small and medium enterprises to reach the office concerned of the Department with their queries on statutory compliance and incentives.

Key Features

- Single gateway to connect with MSME dept for various aspects with less turn around time.
- Quick resolution on raised issue, clear visibility in case of cross dept ticket allocation
- Better closure of raised concern in a proper way
- Different analytics & reports to the dept. of MSME
- Better strategy for resolving issues

Election Queue Management System

Office of The District Magistrate & Collector, Bardhaman & DEO Office,
South Kolkata

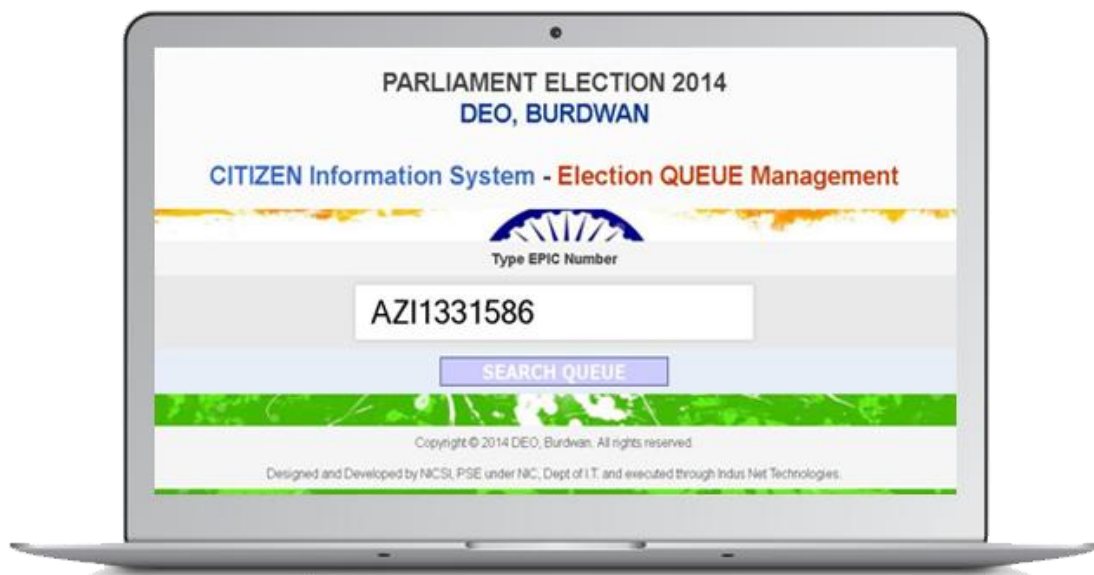

A customized application that has been used by the citizens of Burdwan District extensively during the West Bengal Assembly Election, 2016. Using this system Voters can send an SMS to a predefined number with their EPIC number to get an instant update of the total Voter QUEUE at their Polling Station at any time during the Elections.

This is an immensely useful system for all the citizens. They will be able to track the real-time status of queue, during the Elections and save time avoiding the waiting in the long queues. This may also encourage more people to vote. Alternatively, they will be able to go to burdwan.nic.in or use the Android Mobile App, also developed by Indus Net, for the same purpose.

Key Features

- Vote Bandhu registration through SMS
- Update Voter's in Queue through SMS
- Be acquainted with Voter's in Queue through SMS & website
- Easily tracking of citizens database
- Gather voting information of all polling stations of the district

Election Queue Management System

Office of The District Magistrate & Collector, Bardhaman & DEO Office,
South Kolkata

This app facilitates the electors to know the voters standing in queue on real time basis so that they can know the time when to go for voting at their polling station when the queue is less.
